Model No. FC-90008

Document-No.: FC-90008  
Issue: August 2015

# WELCOME

Thank you for purchasing your Windshield Pro. Please read these instructions carefully before attempting to set up your windshield and retain them for future reference.

If used correctly, your windshield should give you years of trouble free use. We recommend that your windshield is insured against accidental and storm damage as this is not covered by the warranty.

<b>Extionsion Panel</b>	<b>8 Connection Channel</b>	<b>Connection Pole</b>	<b>Leg Pole</b>
 x1	 x3	 x1	 x1
<b>Elastic Ring</b>	<b>Metal Peg</b>	<b>Telescopic Support Pole</b>	<b>Metal Foot</b>
 x1			
<b>Carry Bag</b>			

### OPTIONAL DOOR PANEL

 x1	 x1	 x2	 x1
<b>Carry Bag</b>	<b>Additional Door Panel</b>	<b>8 Connection Channel</b>	<b>Leg Pole</b>
 x1	 x1	 x3	 x1
<b>Metal Foot</b>	<b>Elastic Ring</b>	<b>Metal Peg</b>	<b>Telescopic Support Pole</b>

## RECOMMENDATIONS

Please lay down a groundsheet in advance, to prevent your windshield fabric becoming wet, dirt and damage, before uppacking.

Assemble the windshield at home before setting off on your trip in order to familiarise yourself with its assembly and ensure you have not forgotten anything, especially the first use.

Choose preferably a smooth, level site and remove all sharp objects.

This windshield is designed as a touring awning and for touring use in light to moderate weather.

During strong winds or snowfall we recommend that you take the windshield down.

This windshield is not designed for static, seasonal, permanent pitching or commercial use.

## GENERAL CARE AND USAGE INSTRUCTIONS

### **U.V. Degradation**

Any fabric can be weakened by prolonged exposure to sunlight. Under normal holiday use your windshield will give long service. This degradation can be lessened by the use of proofing solutions such as Fabsil. Once a year (just before you put the windscreen away) cover the fabric with your preferred proofing solution. This will not only help against U.V. degradation, but improves waterproofing and lengthens the life span of your windshield. UV degradation is not covered under the warranty.

### **Usage**

This windshield is designed as a touring windshield and for touring use in light to moderate weather. During strong winds or snowfall we recommend that you take the windshield down. This windshield is not designed for static, seasonal, permanent pitching or commercial use. Disregarding this could lead to invalidation of your warranty.

### **Storage**

Store in a well-ventilated dry place. A wet/damp fabric will develop mildew surprisingly quickly. Dirty fabric can be washed using clean water and a soft brush. Do not scrub and never use detergents.

### **Safety**

**NEVER** cook or use any naked flame near the windshield.

## PITCHING INSTRUCTIONS

1

Unpack the windshield pro and unfold the fabric onto the ground.  
Insert the leg poles into the sleeves.  
Slide the top cross poles into their sleeves.

As shown in the diagram:

Make up the leg support poles by fitting the two poles together.

Then stand the windshield up and push the bottom leg spikes into the ground.

1

2

Connect the top connection poles over the pin on the leg poles.

Then attach the leg support poles one by one making sure the black bracket fits over the pin and under the cross pole bracket as shown on the diagram.

2

## PITCHING INSTRUCTIONS

You are ready to pitch your windshield. Easier with two persons one can hold the windshield in place while the other secures the fittings.

Firstly insert the base plate over the bottom of the leg and secure with the metal peg then peg the base plate to the ground, once you have pegged all the legs and base plates you can adjust the length of the legs with the small black adjusting clamp to make sure the windshield is level.

Then using the pegging bands provided peg the windshield all the way along the bottom of the fabric until secure.

Once pegged the windshield should be tight and without too many creases although this will depend on the ground conditions.

## PITCHING INSTRUCTIONS (OPTIONAL)

### Optional extra panels

You can extend the windshield pro by connecting the optional extra panel available from your retailer.

Simply slide the figure of eight connection channel onto the beading on the end of your Windshield Pro making sure it slides into the stopper at the bottom of the beading then slide the beading on the extension panel onto the other side of the figure of eight channel fit the cross pole and extra leg and peg down.

You can keep extending the windshield as much as you like.

### TIP:

The legs of the Windshield can be used on alternate sides of the windshield for extra stability.
